

Josue Francisco Mejía Morales

Full Stack Developer — Next.js / React / TypeScript

Developer of a multi-country reconciliation platform in production across 6 countries, leading its automation and scalability

Guatemala City, Guatemala jmejiam1@gmail.com jmejia.dev [GitHub](#)

WORK EXPERIENCE

Digifact
Full Stack Developer

Guatemala City
June 2024 – Present

- Automated correction and resubmission of rejected electronic invoices, resolving 70%-80% of tax-related errors without manual intervention, through an error-catalog system built with Next.js and TypeScript.
- Sustained operations for a multi-country reconciliation platform processing up to 8,000 documents daily in Panama and 4,000 weekly in Guatemala, building real-time monitoring dashboards with React, Tailwind CSS, and REST API consumption (JSON/XML) across 6 countries.
- Resolved up to 400,000 documents in a single month during a critical outage from Panama's tax authority (DGI), preventing service interruptions for affected e-invoicing clients.
- Reduced production incident resolution time by handling 4 to 15 daily tickets via Jira, manually validating each change before deployment, and maintaining support continuity during the ASP.NET-to-Next.js frontend migration.
- Designed and implemented electronic invoice formats (XSLT, HTML, CSS) for 6 countries, adapting each structure to local regulatory and tax requirements.

Additional role: Integrations & Support Lead (Digifact Guatemala)

- Improved KPI compliance and response times by 20%, leading a 2-person team and automating support processes, raising customer satisfaction by 30%.

Smart Office Solutions
Digital Solutions Sales Specialist

Guatemala
October 2023 – May 2024

- Advised a portfolio of 30+ clients on the selection and implementation of digital solutions.

Conduent
Phone Support Agent (Billing/Customer Service, UPS account)

Guatemala
February 2023 – May 2023

- Handled 70-100 daily calls in English, achieving a 4.3/5 service satisfaction rating.
